

About The BioSport™:

At The BioSport™, we integrate genomics, AI, and real-time data to help athletes reach peak performance. Using genetic profiling and wearable technology, we deliver personalized insights into fitness, recovery, and injury prevention. Our analysis of over 15,000 gene variants enables tailored programs to optimize muscle composition, endurance, and overall health.

Key Offerings:

- AI-driven athlete profiling with 15,000+ gene variants
- Wearable tech integration for real-time tracking
- DNA-based recovery and injury prevention
- Personalized training plans based on genomics

Generic workout plans don't account for your body's unique needs. The BioSport™ does.

Whether it's slow recovery, recurring injuries, or unexplained plateaus, The BioSport™ is here to guide you.
